

BUFFALO TURBINE DEBRIS BLOWER

TRACKLESSVEHICLES.COM

THE RESULTS WILL BLOW YOU AWAY.

The Buffalo Turbine Debris Blower is powered by the MT's front PTO. To adjust the velocity of the Debris Blower, simply increase or decrease engine RPM via the hand throttle. Nozzle rotation and speed of nozzle rotation are both controlled by the joystick, providing smooth and accurate control.

Since the Debris Blower utilizes the MT's front PTO and joystick, additional switches or controls are not required. This provides ease of operation and makes installation and removal quick and simple.

A 12" round nozzle is standard; optional shaped nozzles are available.
