

COLD PLANER

TRACKLESSVEHICLES.COM

ASPHALT OR CONCRETE, THE CHOICE IS YOURS.

Sidewalk maintenance doesn't stop when the snow melts. Winter freeze-thaw cycles can cause frost heave and wreak havoc on pedestrian walkways, creating differences in sidewalk elevations. These repairs are often outsourced to companies specializing in slab jacking (mudjacking), grinding or milling.

However, a public works department equipped with a Trackless MT and Cold Planer can repair concrete or asphalt surfaces in a cleaner, faster and more cost-effective manner, saving the municipality from unnecessary costs.
