

# DOUBLE TRIP SNOWPLOW

[TRACKLESSVEHICLES.COM](http://TRACKLESSVEHICLES.COM)

## BUILT TO TACKLE WINTER'S TOUGHEST CHALLENGES.

The design of the Double Trip Plow provides safer operation on uneven sidewalk surfaces.

The double trip system trips the mouldboard 35° and the cutting edge 40°. With this type of trip system, the operator is not required to stop or slow down for the mouldboard and cutting edge to return to position.

The tripping of the Plow is also smoother than conventional mouldboard trip or cutting-edge trip plows.
