

FRONT FLAIL MOWER

TRACKLESSVEHICLES.COM

MOW LIKE NO OTHER.

The Front Flail Mower was designed to cut heavier grass, weeds, scrub and light brush where a standard rotary lawn mower could not cope. An enclosed mower housing and rubber safety skirts keep the cut grass, mulch and other debris within the cutting chamber. This allows for safe mowing near roads, parks and other busy areas.

Large gauge wheels and a full-width gauge roller give the mower front-to-rear flexibility, allowing it to follow ground contours, producing an even cut without turf damage.
