## 365-DAY VERSATILITY.

In addition to sweeping snow, sand, gravel or other debris from sidewalks, parking lots and cul-de-sacs, the Sweeper can be used to dethatch large lawns and playing fields.

The high-output hydraulics of the Trackless MT directly drive the broom head, while a relief valve protects the core from twisting in overload conditions. The scissor frame is designed to automatically centre the sweeping pattern in front of the tractor as the broom is angled.

The Sweeper is available with 3 bristle options to accommodate various applications: all poly, 1/2 poly and 1/2 wire, and all wire.
