

SIERRA SNOWBLOWER

TRACKLESSVEHICLES.COM

BUILT TO TACKLE WINTER'S TOUGHEST CHALLENGES.

Designed for higher output, the Sierra Snowblower outperforms all others in heavy, wet snow. This snowblower was designed to aggressively cut into frozen snowbanks, clearing the way for vehicles and pedestrians in any snow conditions.

The attachment's auger flighting is reinforced for added strength and longevity, and the chute folds away with a damper allowing for easy clean-out. A hydraulic pitch top-link is included for steep inclines. Open side augers provide increased performance and manoeuvrability. Cutter bars are 67" high for added visibility in heavy snow conditions.
