

# UNDER GUARDRAIL MOWER

[TRACKLESSVEHICLES.COM](http://TRACKLESSVEHICLES.COM)

The compact, low-profile design of the Under Guardrail Mower allows it to mow in tight spaces and around obstacles without needing to stop or reposition the machine.

The three pivoting trimmer heads of the Under Guardrail Mower automatically adjust to mow around posts or other obstacles, clearing vegetation without missing large areas. The 37" working width of the attachment offers good coverage. The Under Guardrail Mower is compatible with the MT5, MT6 & MT7. The steel blades cut through grass and weeds, while the nylon trimmer line trims around the post without causing damage.

The Under Guardrail Mower allows for angle adjustments up to +45° for slopes and down to -30° for ditches and trenches.
